Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

The indicated allowability of claims 1-4 and 6 is withdrawn in view of the newly discovered references to Ferree (US Patent Publication Number 2003/0204260) and Van Hoeck et al. (US Patent Publication Number 2005/0187631). Rejections based on the newly cited references follow.

Applicant is advised that the Notice of Allowance mailed on September 22, 2005 is vacated. If the issue fee has already been paid, applicant may request a refund or request that the fee be credited to a deposit account. However, applicant may wait until the application is either found allowable or held abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that the previously submitted issue fee be applied. If abandoned, applicant may request refund or credit to a specified Deposit Account.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3733

Claims 1-2, 4 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Ferree (US Patent Publication Number 2003/0204260).

Ferree discloses a cervical intervertebral prosthesis, 102, comprising two cover plates configured to be connected to adjacent vertebral bodies, a circular securing plate, 106, separate from the cover plates, which secures only one of the cover plates and is configured to be fastened to the ventral surface of the one of the vertebral bodies and a prosthesis core, which forms an articular joint with one of the cover plates (see figure 1 below). Furthermore, one of the cover plates is provided with a limit stop surface facing in a dorsal direction relative to the vertebral bodies (see alternative embodiment of figure 10).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ferree (US Patent Publication Number 2003/0204260) in view of Van Hoeck et al. (U.S. Patent Publication Number 2005/0187631). Ferree discloses the claimed invention except for the securing plate being biodegradable. Van Hoeck et al. disclose a prosthetic device comprising a biodegradable securing plate, 30 (see figure 1a) and teaches that the plate is composed of a material that is adapted to lose substance, degrade, decay or dissolve gradually over time (see paragraph 0024). It would have been obvious to one skilled in the art at the time the invention was made to construct the prosthetic device of Ferree with the securing plate being biodegradable, in view of Van Hoeck et al., in order to provide a securing plate that would be composed of a material adapted to lose substance, degrade, decay or dissolve gradually over time.

Response to Arguments

Applicant's arguments with respect to claims 1-4 and 6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO 892 for art cited of interest.
